

Agronomic core (DPI 2026 balance)

Soil analysis, crop, yield, climate,
previous crop, organic inputs

Per-term N balance (A to G)
→ N_balance()

P_balance() K_balance()

MAS caps:
get_MAS() / check_MAS()

plan_distribution()
farm_balance()

Field-level target dose

Precision-agriculture module

Sentinel-2 L2A time series

compute_vi()
vegetation indices

estimate_biophysical()
GPR canopy traits

compute_NNI()
Nitrogen Nutrition Index

variable_rate_N()
build_strip_prescription()

export_prescription()
ISOXML / shapefile / GeoJSON

DPI 2026 coefficient tables: crop uptake, leaching and immobilization factors, MAS limits,
organic-N efficiency, fertiliser catalogue

*target dose,
(mass-balance
constraint)*
